One of our most popular field trips ever! A visit to the farm of **Lorraine and Tommy Tuck**, where Tommy presides over his bee hives (“apiary”) and pollinator beds and loves to teach about the fascinating lives of bees, their essential role in maintaining the agriculture that feeds us all, and what we can do to help support them. If you want to learn more about the importance of bees, Tommy will have you seeing them in a whole new light.

Bring a folding chair, water bottle, sun hat or sunglasses & sunscreen.
